WORLD HEPATITIS DAY 28 JULY

HEPATITIS? THINK AGAIN.

Hepatitis virus types A, B, C, D and E cause infection and inflammation of the liver that can lead to severe disease and death.

HEPATITIS B,C & D

Spread by **blood**, **semen** and other **body fluids**

- Talk to your healthcare provider about the hepatitis B vaccine
- NEVER share needles, razors or toothbrushes
- If you are pregnant, talk to your doctor about how to prevent transmission to your baby
- Use only sterilized tattoo and piercing instruments
- Use condoms correctly and consistently
- Where possible, choose oral medications instead of injections

- You've ever had medical or dental treatment with unsterile instruments
- You've received a blood transfusion in a country that does not test for hepatitis
- Your mother was infected with hepatitis when you were born
- You have **ever** injected drugs
- You are living with HIV

Nore than **1 MILLION PEOPLE DIE** each year from disease caused by **hepatitis B & C.**

Most of those infected don't know they have it, INCREASING THE RISK of developing severe liver disease and transmitting the virus to others
